

INTRODUCING THE Premier Point Home Health

TeleHealth Monitoring Program

In collaboration with Ideal Life®, Premier Point Home Health is happy to introduce our TeleHealth Monitoring Program. This state-of-the-art technology provides detailed 24/7 monitoring of patients with chronic conditions in the convenience of their own homes, enhancing the high quality of care our dedicated professionals already provide. Benefits include:

- ◀ Decreased Hospital and ER Admissions
- ◀ Reduced Costs
- ◀ Efficient - serve more patients in less time
- ◀ Simple Setup and User-Friendly
- ◀ 24/7 Contact - alerts monitored in real time

Enrolled patients are provided with multiple devices that are connected to a cloud-based software system.

The simple and customizable system gathers real time biometric and activity data, allowing integrated and coordinated support with the full care team: nurse case managers, physicians, caregivers, family members and the individuals themselves.

Ideal Life Pod Manager™

This FDA approved monitoring device is the main communication hub that allows syncing of equipment. All that is needed is an electrical outlet to be fully functional.

Ideal Life SpO2 Manager™

Small design allows for convenient measuring of a user's oxygen saturation and heart rate.

Ideal Life Blood Pressure Manager™

An easy to use device that quickly and accurately measures upper arm blood pressure and heart rate.

Ideal Life Body Manager™

A body scale designed for easy use and provides a stable platform.
